

Abstract of the Disclosure

Ae without causing movement or peeling of the relief film and yet may facilitate the re-sticking thereto. A urethane prepolymer represented the formula [I]:

A-O-CONH-B-NHCO-

-[O-C_pH_q(O-CO-C_rH_s-CO-O-C_pH_q)_t-O-CONH-B-NHCO]_v-(O-D-O-CONH-B-NHCO)_r-
 -{O-C_pH_q-(O-CO-C_rH_s-CO-O-C_pH_q)_t-O-CONH-B-NHCO}_u]_w-O-E[I]

polymerizes and cures to make adhesive polymer. The adhesive polymer is used for an adhesive material for fixing a relief film onto a printing base of a printing machine.
